Engineered Simplicity

Create Your Favorite Space!

InSoFast Insulation Panels can transform any room into a favorite space of comfort. They provide a solution to increase living space, improve energy savings, and create a safer, healthier environment for the people you care about most.

InSoFast Insulation Panels are optimized with closed-cell injection molded EPS foam to achieve an energy smart and environmentally friendly solution. They are engineered with the thoughtful details need to simplify installation with an insulated stud, electrical raceways, rain screen, and vapor barrier.

InSoFast Panels are the top choice for contractors and homeowners as they achieve code compliance, improve air sealing, and simplifying the installation process with their versatile and durable design. They are designed to eliminate thermal bridging so you get the most out of your insulation.

The Ultimate System for New, Retrofit, Exterior, Interior, Walls, Roofs, Floors, Ceilings!

CREATE YOUR FAVORITE SPACE

By reducing energy consumption, lowering utility bills and enhancing indoor comfort, InSoFast insulation pays for itself over time, providing a high return on investment for any project.

Built-in Studs & Electrical Raceways

The integrated studs, every 16", provide an attachment point for siding, drywall or cabinets and our 3/4" electrical raceways make wiring easy.

Drain and Dry Technology

Engineered for interior and exterior applications in new or retrofit projects, our interlocking tongue and groove design provides vapor and moisture control, no musty smell, and a healthy alternative for insulation projects. Our rain screen "drain & dry" technology has built-in dual drainage planes to keep your building safe & dry.
